

- Wireless Security Assessment -

Strengthening the security posture of your wireless network

SERVICE OVERVIEW

Your business depends on employees having reliable and secure wireless access. Wireless communication enables mobility; however, mobility can introduce security gaps that can often go undetected.

Without ensuring that you maintain a secure configuration, your business is unable to control unauthorized network access.

Canary Trap's Wireless Security Assessment aims to identify security gaps that can be leveraged by adversaries to cause harm.

Canary Trap's security experts will make sure that your wireless security meets or exceeds industry best practices and regulatory compliance standards.

Engage Canary Trap Specialists

Complete our Scoping Questionnaire online at www.CanaryTrap.com or contact us directly by telephone or email. We look forward to understanding your unique security requirements and key business objectives.

Executive Report

An Executive Report will highlight any identified security gaps for remediation. Canary Trap can be reengaged to retest and will issue a Security Certificate upon validating that the identified security gaps have been resolved.

The Canary Trap Approach

- ✓ Step 1: Scope the Engagement
- ✓ Step 2: Project Kick-off
- ✓ Step 3: Commence Testing
- ✓ Step 4: Report on Findings
- ✓ Step 5: Retest
