CANARYTRAP

Catching Vulnerabilities and Trapping Exploits

Canary Trap's elite team of security experts come armed with the tools, experience and credentials to help improve your organization's security resiliency and cyber risk posture.

- CYBERSECURITY INCIDENT MANAGEMENT PLANNING -

Be prepared to respond to a cyber incident effectively and efficiently.

SERVICE OVERVIEW

In the realm of cybersecurity, a well-thought-out Incident Management Plan (IMP) is of paramount importance. The IMP should encompass documented policies and playbooks that lay out the necessary steps to be taken in the event of a security incident or data breach. The ultimate goal is to ensure a rapid and efficient response that mitigates the associated risks and impacts.

At Canary Trap, we understand the significance of tailoring policies to align with your organization's corporate structure, company culture and operations. Recognizing that each organization is unique, we write customized policies to ensure they meet your specific objectives, capabilities, and compliance obligations.

Our playbooks, presented as graphical flowcharts, are accompanied by explanatory text and serve as comprehensive set of guidelines for key business stakeholders during security incidents.

By adhering to these playbooks, stakeholders gain clarity on the precise actions to be taken, enabling them to resolve incidents effectively and expeditiously. Canary Trap's playbooks facilitate a structured approach that fosters consistency and coordination among the various teams involved in incident response.

Canary Trap combines human expertise with sophisticated tools, proven methodologies and, where appropriate, threat intelligence to ensure a thorough, in-depth approach to security testing, advisory and assessments.
