

Catching Vulnerabilities and Trapping Exploits

Canary Trap's elite team of security experts come armed with the tools, experience and credentials to help improve your organization's security resiliency and cyber risk posture.

- MICROSOFT 365 SECURITY CONTROLS REVIEW -

Ensure your data within Microsoft 365 is safe and secure.

SERVICE OVERVIEW

As cloud adoption continues to accelerate, so do the security risks associated with it. The security provided by Microsoft in their platforms (described in detail in Microsoft's Trust Center) must be preserved and extended through the awareness, choices, and actions of each application administrator. The system must be designed to protect against accidental and malicious disclosure of data.

The Canary Trap Microsoft 365 (M365) Security Controls Review seeks to improve your organization's security posture and resiliency within your M365 environment(s). Our goal is to enhance security and safeguard your valuable data from threats and vulnerabilities. We thoroughly examine your M365 deployment, fortifying your digital ecosystem against accidental and malicious data disclosure.

Canary Trap's M365 Security Controls Review includes reviewing security settings applied to Exchange Online, Teams, SharePoint Online and other M365 platforms, including:

- ✓ Identity and Access Management
- ✓ Data Protection
- ✓ Threat Protection
- ✓ Compliance
- ✓ Mailbox and Collaboration Security
- ✓ Device and Application Management
- ✓ Security Administration

Canary Trap combines human expertise with sophisticated tools, proven methodologies and, where appropriate, threat intelligence to ensure a thorough, in-depth approach to security testing, advisory and assessments.
