CANARYTRAP

Catching Vulnerabilities & Trapping Exploits

Canary Trap's elite team of security experts come armed with the tools, experience and credentials to help improve your organization's security resiliency and cyber risk posture.

MICROSOFT 365 SECURITY CONTROLS REVIEW

Ensuring your data within Microsoft 365 is safe and secure.

SERVICE OVERVIEW

As enterprises continue to expand their usage and data footprints within Microsoft 365 (M365), security practitioners must safeguard against any potential cyber risks that could result in accidental or malicious data disclosure.

Canary Trap's M365 Security Controls Review aims to ensure that your valuable data within M365 is properly safeguarded from internal and external threats. We will review the security settings applied to Exchange Online, Teams, SharePoint Online and other M365 platforms, including:

- ✓ Identity and Access Management
- ✓ Data Protection
- ✓ Threat Protection
- ✓ Compliance
- ✓ Mailbox and Collaboration Security
- ✓ Device and Application Management
- ✓ Security Administration

Canary Trap's M365 Security Controls Review can be undertaken with minimal knowledge of your environment, including the processes or specific applications which are in use.

At the end of the engagement, Canary Trap will deliver a comprehensive Report of Findings which will highlight opportunities to improve security and mitigate cyber risk.

Canary Trap combines human expertise with sophisticated tools, proven methodologies and, where appropriate, threat intelligence to ensure a thorough, in-depth approach to security testing, advisory and assessments.

Engage Canary Trap Specialists

Complete our Scoping Questionnaire at www.canarytrap.com or Contact Us directly by telephone or email.

Report of Findings

Canary Trap will deliver a Report of Findings highlighting any identified vulnerabilities for remediation.

The Canary Trap Approach

- ✓ **Step 1:** Define
- ✓ **Step 2:** Assess
- ✓ **Step 3:** Report
- ✓ **Step 4:** Remediate
